

Giulio Zhou

Email: giuliozhou8@gmail.com | **Website:** giuliozhou.com | **GitHub:** github.com/giulio-zhou

Education

Carnegie Mellon University (Pittsburgh, PA) 08/2017 – present

PhD, Computer Science

Advisors: Dave Andersen, Michael Kaminsky

University of California, Berkeley (Berkeley, CA) 08/2012 – 12/2016

Bachelor of Arts, Computer Science

Cumulative GPA: 3.893

Relevant Coursework: Machine Learning, Artificial Intelligence, Computer Vision, Operating Systems, Image Processing, Probability and Random Processes, Computer Networking, Database Systems.

Research Experience

Intel Science and Technology Center for Visual Cloud Systems 08/2017 – present

Algorithms, Machines and People Lab 05/2016 – 12/2016

- Worked under Joseph Gonzalez on Clipper, a system for online, low-latency machine learning model serving.
- Benchmarked Clipper RPC system on AlexNet, Network-in-Network and Inception Tensorflow models, demonstrating throughput and latency parity with Google's Tensorflow Serving system.
- Explored the use of classification and hypothesis testing techniques for real-time covariate shift detection and adaptation through online reweighted model retraining.
- Publication: Daniel Crankshaw, Xin Wang, **Giulio Zhou**, Michael J. Franklin, Joseph E. Gonzalez, Ion Stoica. *Clipper: A Low-Latency Online Prediction Serving System*. NSDI, 2017.

Berkeley Artificial Intelligence Research Lab 03/2015 – 12/2016

- Worked under Stuart Russell on sampling algorithms for Bayesian LOGic (BLOG), an open-universe probabilistic modeling language.
- Implemented a Gaussian Mixture Model (with temporal and spatial constraints) for background subtraction in video sequences. Written in 10 lines of BLOG code, the algorithm achieves comparable performance to OpenCV's state-of-the-art background subtraction libraries. Submitted to DARPA as part of DARPA's Probabilistic Programming for Advancing Machine Learning (PPAML) initiative.

Industry Experience

Google, inc. 03/2017 – 08/2017

Software Engineer

- Worked on the Google Keyboard team, using machine learning algorithms to improve the keyboard typing experience.
- Created infrastructure to support analytics data pipelines and subsequently fast, interactive data visualization.
- Built a framework for the generation, management and evaluation of test sets for all of Google Keyboard.

Google, inc. 05/2015 – 08/2015

Software Engineering Intern

- Worked on the Display Ad Automation Team to improve the quality of Native Ads.
- Designed and built a backend pipeline for high-quality automated text-to-image matching for internationalized display ads.
- Developed quality visualization tools and deployed non-English Native Ads, doubling overall ad coverage.

Teaching Experience

CS 189/289A, Introduction to Machine Learning (Fall 2016)

CS 61BL, Data Structures and Programming Methodology (Summer 2016)

CS 61B, Data Structures and Algorithms (Spring 2016)

Technical Skills

Programming Languages: Python, Java, C, C++, MATLAB, SQL, Rust, HTML/CSS/JS, \LaTeX

Software/Frameworks: Caffe, Tensorflow, Django, Apache Spark, Hadoop MapReduce, scikit-learn, scikit-image
